

AUTOGATE, INC.

Don't take our word for it!

Read what people in the industry are saying about our product.

"We have used AutoGate brand gates since they started building them. We have worked on most of the VPL gates that are available. There is NO comparison to the quality of AutoGate products."

Tim Calvin, President, Calvin Access Controls, Inc.

"AutoGate offers quality products and craftsmanship. As a dealer of another gate manufacturer we found that the quality was not equal to AutoGate's. AutoGate's VPL installs easily, has minimal maintenance and over-all is a higher quality product."

Jim Del Sordo Jr., President, Automated Security Corp

"Heavy Snow and freezing weather (-58 degrees F) has never affected the Vertical Pivot Lift Gate. Our clients as well as our company are very happy with this product. That's why we keep buying the VPL!"

Marcel Thibault, Quebec Systems, Charlesbourg, Quebec, Canada

"It has been our experience that the operators have functioned extremely well in all weather conditions, including extreme temperatures from 90 degrees to 60 degrees below zero. They continue to function well during snow and ice conditions. We anticipate that they will continue to so do with no problems whatsoever"

Scott Colledge, Denali Fenceworks, Fairbanks, AK

"We have purchased two AutoGate Vertical Pivot Lift Gates over the past three years. We have had no problems with our Automatic Gates, and were very pleased with the kind and knowledgeable service provided by our representative."

Kevin Ackerman, Superintendent, Village of Milan Water/Wastewater Dept., Milan, Ohio
