

IRB-325

UL325-2018 INFRARED PHOTOEYE

Applications

The IRB-325 is an external entrapment protection device type B1, non-contact sensor for use with automatic gates and doors. The device is UL325-2018 compliant with operators that require NC monitoring.

The long range and thru-beam features of the IRB-325 offer a reliable solution to all external entrapment protection needs. A robust, NEMA 4X enclosure provides the durability required for any safety application. The lens-less design minimizes fogging and false triggering caused by small objects and provides for easy alignment.
